SAFETY INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

WHEN USING ELECTRICAL APPLIANCES, BASIC PRECAUTIONS SHOULD ALWAYS BE FOLLOWED TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, AND INJURY TO PERSONS, INCLUDING THE FOLLOWING:

- 1) Read all instructions before using this heater.
- 2) This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this heater. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9 m) away from the front of the heater and keep them away from the sides and rear.
- 3) Extreme caution is necessary when any heater is used by or near children or invalids and whenever the heater is left operating and unattended.
- 4) Always unplug heater when not in use.
- 5) Do not operate any heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner. Return heater to authorized service facility for examination, electrical or mechanical adjustment, or repair.
- 6) Do not use outdoors.
- 7) This heater is not intended for use in bathrooms, laundry areas and similar indoor locations. Never locate heater where it may fall into a bathtub or other water container.
- 8) Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Arrange cord away from traffic area and where it will not be tripped over.
- 9) To disconnect heater, turn controls to off, then remove plug from outlet.
- 10) Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
- 11) To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where openings may become blocked.
- 12) A heater has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint, or flammable liquids are used or stored.
- 13) Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
- 14) Avoid the use of an extension cord because the extension cord may overheat and cause a risk of fire. However, if you have to use an extension cord, the cord shall be No.14AWG minimum size and rated not less than 1875 watts.
- 15) Do not plug this product into a receptacle controlled by a wall switch or dimmer.
- 16) When storing or transporting the unit and cord, keep in a dry place, free from excessive vibration and store so as to avoid damage.

**SAVE THESE INSTRUCTIONS
FOR FUTURE USE.**

SAFETY INSTRUCTIONS

NOTE: The stove may emit a slight harmless odor when first turned on. This is caused by activating the internal heater components for the first time and should not occur again.

A 15 AMP circuit is required to operate this heater. If the breaker trips when the heater is used then you may need to move the heater to another location or unplug other appliances that are on the same circuit. If you require an extension cord use one that is rated at 1875 watts.

IMPORTANT

Please note: When you open the carton carefully check the unit and make sure there is no damage. If you have any problems with the unit, with how the various functions work, damaged or missing parts please call 1-800-459-4409 (9am to 5 pm EST) immediately for service.

NOTE: DO NOT RETURN UNIT TO THE STORE BEFORE CALLING THE TOLL FREE NUMBER

Do not dispose of your cartons until you are completely satisfied with your new stove heater.

NOTE: Light bulbs may become loose during shipping. If the flame effect is dim or does not work, please check that light bulb or bulbs are finger tight in socket. See instructions for replacing bulb or bulbs. Please do not return the sample to the store before checking light bulbs.

After completely reading instructions, confirm that all controls on stove are in the off position. Plug the unit into a 15 amp, 120 volt outlet.

OPERATION

Controls and switches are located on front panel inside the glass door.

FLAME: Press this button into the I position for main power and flame effect. The indicator light will turn on. See below for other control switches.

HEATING: For low heat function - Press this switch while the FLAME switch is in the I position for low heat. The indicator light will turn on.

TURBO: For high heat function - Press this switch while the FLAME and HEATING switches are in the I position for high heat. The indicator light will turn on.

THERMOSTAT: To adjust the temperature to your individual requirements. Turn the thermostat dial to the right (clockwise) to increase the desired temperature and to the left for lower temperature. This thermostat control dial can only be used while the FLAME switch and HEATING/TURBO switches are in the I position.

When the heater reaches the desired temperature, the heater and Heating /Turbo indicator light will turn off but the fan will continue to operate. Adjust this knob to restart the heater.

FLAME INTENSITY: Turn the dimmer dial clockwise or counter clockwise to get the desired flame intensity. The dimmer switch can only be used when the FLAME switch is in the I position.

OPERATION / MAINTENANCE

NOTE: When the FLAME switch is turned in On position, all other heater functions will stop even though the switches may be in the I position.

THERMOSTAT CONTROL

The heat output is controlled by the thermostat, according to the room temperature. Set the thermostat dial fully clockwise to the maximum position initially.

When the room is warm enough, reduce the setting by slowly turning the thermostat dial anticlockwise until the heater just clicks off. This will then maintain the room temperature at the desired level.

CAUTION

If you use this heater in conjunction with a thermal control, a programme controller, a timer or any other device that switches on the heater automatically, remember to observe all safety warnings at all times.

The stove heater has a safety overheat protection. If the overheat protection trips, turn off the FLAME switch and unplug the power cord from the receptacle. It should reset automatically after 5 minutes.

WARNING

Disconnect power and unplug the power cord before attempting any maintenance or cleaning to reduce the risk of fire, electric shock or personal injury. The bulbs in your unit can become extremely hot. Allow at least 10 minutes between turning off the unit and removing the light bulbs to avoid the accidental burning of the skin.

FLAME EFFECT

The fire effect is created with the use of a 40 watt B-10 candelabra light bulb with an E-12 (small) socket base. The light bulb will have to be replaced from time to time when they burn out.

During normal operation the stove heater will always give you simulated flame function. If the intensity of flame suddenly increases, it means that the light bulb is going to burn out.

Replace the light bulb immediately according to the instruction and do not operate the stove heater when the light bulb burns out or without the light bulb.

CHANGING THE LIGHT BULB

STEP 1: Open the door of unit with the handle.

STEP 2: Loosen the 2 screws at the front of the log set inside the stove. Carefully lift the logset up far enough to access the light bulbs. You will find 1 X 40W Type B-10 candelabra light bulb with E-12 socket base at the bottom.

STEP 3: Replace the burned out light bulb using a new 40 watt Type B-10 candelabra light bulb.

STEP 4: Reinstall the logset.

STEP 5: Plug in the unit.

WARRANTY

CLEANING

To clean unit first turn off controls on unit and unplug unit from power source.

To clean glass door; remove dust with clean dry cloth or to remove finger prints and other marks clean glass with clean damp cloth. Do not use abrasive cleaners or spray liquids on glass door surface.

Metal and metal painted parts should be cleaned with damp cloth. Do not use abrasive cleaners or spray liquids on these surfaces.

WARRANTY

Every electric stove is tested before it leaves the factory and it is guaranteed for one year. If the unit should fail to operate correctly within one year from the date of purchase, call customer service at 1-800-459-4409 EST. We will, at our discretion either repair or replace the unit. It will have to be returned to us freight prepaid and we will return the repaired or replaced unit to you freight prepaid. The company's sole obligation is to repair or replace the unit. This warranty is void if in the opinion of Quality Craft the unit has been tampered with, altered, misused, damaged, abused or used with the wrong power source. Light bulbs are not covered by this warranty. The warranty is for homeowner use only and does not cover units used in commercial situations.
